Trade and Innovation

# Solution providers directory

[#SayNoToPaper](#)

**The trading system is changing as it moves into the digital era to become cheaper, faster, simpler, secure and sustainable. Trade will be data driven, systems will be de-centralised and interoperable to enable information to flow across platforms, systems and jurisdictions.**

To support the transition to digitalised trade, this directory is designed to help companies identify which solution providers to work with. All solution providers listed have proven track records in trade digitalisation, offering a variety of related services. The directory focuses on three key documentary processes enabled by the Electronic Trade Documents Act; electronic bills of exchange, promissory notes and bills of lading.

All listed solution providers support the ICC goal to create an open, interoperable trading environment.

## KEY TO DIRECTORY SYMBOLS

e-bill of lading

e-bill of exchange

e-promissory note

Approved by  
marine insurers

Working with banks/  
financial institutions
